

WORK BARGE K9128 WITH 200 TON CRAWLER CRANE

Multipurpose lifting solution

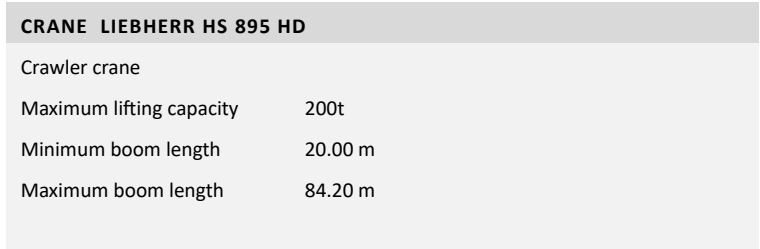

The K9128 is a flattop work barge with a large open deck space that is perfectly suitable for carrying heavy loads and is surrounded with a bin wall that allows for the secured stacking of materials. Installed on the barge is a strong 4 point mooring system for safe and secure mooring capabilities. With its shallow draft it can easily operate in near coastal waters and with its stable seagoing behavior it can also perfectly be deployed in further offshore operating area's as well.

The K9128 features the ability to fill gas and oxygen bottles used for cutting operations since it's outfitted with an oxygen factory and gas bottle filling station.

The K9128 is currently equipped with a Liebherr HS 895 HD crawler crane.

BARGE K9128	
Flag & Port of registry	Panama
IMO number & Call sign	N/A & 3E3892
Classification society	INSB Class
Year build	2007
Length overall	91,44 [m]
Breadth	27,44 [m]
Depth	6,10 [m]
Draft	1,00 – 4,87 [m]
Deck strength	15 [ts/m3]
Dwt	9.000 [t]
GT / NT	3.923 [t] / 1.176 [t]
